Under Abyss

SUBMERGED BENCH IN PVC

The Under Abyss system is the ideal stylish solution for new **pools with a high water level or overflow**. Installed at the bottom of the basin, it does not restrict your swimming space and the pool cover is completely hidden under a PVC enclosure easily covered by a liner or mosaic. The cover comes out of a discreet opening at the back.

Used in combination with Covrex® slats, the Under Abyss offers the best in terms of **safety** and **energy savings**, whether with the Covrex® Solar and its exceptional heating properties, or with the Covrex® Classic, which offers the best insulation coefficient on the market.

Located in the stainless steel axle, the engine offers **optimal performance** while remaining **silent**.

Like all Covrex® drive systems, the Under Abyss is made in Belgium with the **best quality** of stainless steel.

Technical features

-  **Made of 316L stainless steel**
Maximum service life
-  **Maximum swimming space**
The system is installed at the bottom of the pool
-  **Submerged**
and easy-to-maintain motor
-  **Invisible system**
fully submerged under the water level
-  **Compatible with all pools**
No length limit
-  **Very high water level**
Compatible with infinity pools
-  **Stairs included**
The Covrex® cover fits to the shape of the pool, including stairs

Even more benefits of the Under Abyss:

-  **swimming space**
Installed at the bottom of the pool, the Under Abyss guarantees maximum swimming space.
-  **stylish**
Enjoy a submerged bench while hiding the system and cover.
-  **easy maintenance**
Access the system by simply lifting the top panel of the bench.
